

Roomies App – Fully Dressed Use Cases

Use Case 1: User Registration and Profile Setup

Use Case ID: UC-01

Actor: New User

Description: A new user signs up and creates a profile with lifestyle and housing preferences.

Preconditions: The app is installed and the user is not yet registered.

Postconditions: The user is registered and their profile is saved to the system.

- Main Flow:
 1. User launches the Roomies app.
 2. User selects “Sign Up.”
 3. User enters basic information (name, email, password) or authenticates via Google/Apple.
 4. User completes a lifestyle and preference quiz (e.g., bedtime, smoking, study habits, major, cleanliness).
 5. User sets their roommate/housing preferences (e.g., preferred gender, noise level, shared interests).
 6. User saves the profile.
 7. System confirms successful registration.
- Alternative Flows:
 - Sign-up fails due to missing fields or existing account → Display error and prompt for correction.
 - User skips quiz → System allows limited use but prompts completion later.

Use Case 2: Browse and Match with Roommates

Use Case ID: UC-02

Actor: Registered User

Description: A user browses profiles and matches with potential roommates.

Preconditions: The user is logged in and has a completed profile.

Postconditions: A match is made or skipped.

- Main Flow:

8. User taps "Find Roommates."
 9. System presents swipeable cards of potential roommate profiles (Tinder-style).
 10. User swipes right to like or left to skip.
 11. If two users swipe right on each other, a match is created.
 12. Matched users are notified and a chat channel is opened.
- Alternative Flows:
 - No matches available → Notify user and suggest adjusting preferences.
 - User reports or blocks a profile → System hides and flags for review.

Use Case 3: Chat with Matched Roommates

Use Case ID: UC-03

Actor: Matched User

Description: Users chat with each other after matching to discuss living arrangements.

Preconditions: A successful match exists between two users.

Postconditions: Users engage in conversation or end chat.

- Main Flow:
13. User opens the "Matches" section.
 14. User selects a matched profile.
 15. A chat interface opens for real-time messaging.
 16. Users exchange messages to learn more about each other.
 17. Users may decide to proceed with living together and mark each other as "Confirmed Roommate."
- Alternative Flows:
 - One user unmatched → Chat is closed and both parties are notified.
 - Users request to match with a third roommate → Group chat is created (optional future feature).

Use Case 4: Edit Profile and Preferences

Use Case ID: UC-04

Actor: Registered User

Description: A user updates their personal information and matching preferences.

Preconditions: The user is logged in.

Postconditions: Updated profile is saved and reflected in future matches.

- Main Flow:

18. User opens the profile settings.

19. User modifies details such as bio, lifestyle quiz answers, photos, or housing preferences.

20. User saves the changes.

21. System updates the profile and recalculates match relevance.

- Alternative Flows:

- Incomplete or invalid data → Display error and prompt correction.

- Save fails due to connection issue → Retry prompt shown.
